

## **FECA's Florida Legislative Report**

### **March 29, 2019**

This week, both Chambers started reviewing their respective budgets in earnest. One item in the budget would potentially impact the Volkswagen Settlement Mitigation Plan (Plan), which is rumored to be awaiting the Governor's signature. Upon the Governor's approval, DEP will begin the process for implementation of the Plan. Though Florida has not yet received any money from the VW settlement, both Chambers have appropriated monies to absorb the administrative costs associated with implementation. We will continue to monitor the budget movement and the approval of the mitigation plan so that you are aware of possible grant opportunities for EVs, charging stations and other projects.

The Judiciary Committees in both Chambers released bills that would drastically change the way signatures are gathered for Citizen Initiatives. The bill would become effective upon becoming law and it appears that it would apply to all current initiatives that are not yet on the ballot, including the re-reregulation initiative. Please see the bill summary below for more details.

The Supreme Court released the case calendar for the Re-Regulation Citizen Initiative, outlining the dates for all briefs and oral arguments. Please see below under the Citizen Initiative Section of the report.

Several bills in the report do not appear to be moving and are now at the end of the report. We will continue to monitor these bill as they could re-appear as amendments later in session. Below are the current bills of interest that have been filed thus far. Each week, the report will prioritize in the following manner: New legislation filed, priority, monitor, tracking and bills that appear to be dead. Any new activities will be highlighted in **RED**. If you would like more detailed information or an explanation on any legislation or why it is located in a specific area, please do not hesitate to reach out to Allison or Mike.

**Sponsors:** Sen. Farmer/Rep. D. Smith

**Summary:**

Under current law only IOUs are required to follow notification and certification requirements relating to medically essential electric utility service & service disconnection which are overseen by the FPSC. HB 651: Ready for the floor?

**Theft**

(SB 406/HB 589)

**Sponsors:** Sen. Brandes / Rep. Donalds

**Summary: This bill is very similar to SB 928/HB713 from last session. Last year, an amendment that addressed our concerns was adopted to the House version. Neither bill passed their chamber. SB 406 begins with the original language found in SB 928.**

The theft of utility services is punishable as provided in Section 812.014, F.S. Currently under this Section, a person could be convicted of grand theft and a felony of the third degree if the property stolen is valued at several amounts but the lowest amount is \$300 or more, but less than \$5,000. This legislation would raise the lowest amount for this conviction from \$300 to \$1500 which could reduce the number of eligible convictions for theft of utility services.

House Bill 589, the companion to SB 406, has been filed but the language is different. HB 589 houses language developed last year to specifically identify theft of utility services as a third-degree felony.

**Committee Assignments:**

SB 406: Appropriations

HB 589: Judiciary Committee

**ACTION RECOMMENDED: NEUTRAL**

**ACTION ITEM: HOUSE Justice Appropriations Subcommittee - PASSED**

**Criminal Justice**

(SB 7072 /HB \_\_\_\_)

**Sponsors:** Sen. Bradley /Rep. \_\_\_\_

**Summary:**

This legislation is an overarching criminal justice overhaul that encompasses modified language housed in SB 406, relating to theft. The theft of utility services is punishable as provided in Section 812.014, F.S. Currently under this Section, a person could be convicted of grand theft and a felony of the third degree if the property stolen is valued at several amounts but the lowest amount is \$300 or more, but less than \$5,000. This legislation would raise the lowest amount for this conviction from \$300 to \$750 which could reduce the number of eligible convictions for theft of utility services.

**TRACKING**

**Public Meetings / Local Government Utility**

(SB 450/HB 327)

**Sponsors:** Sen. Gibson /Rep. Davis

**Summary:**

The legislation creates a public meeting requirements exemption for the portion of a meeting held by a utility owned and operated by a unit of local government when discussing the security of the technology, processes or practices of certain utilities. The exemption covers any portion of the meeting regarding the vulnerabilities within the system that could make it susceptible to attacks or expose the utility service to disruption or damage.

### **Regional Rural Development Grants**

(SB 596/HB 671)

**Sponsors:** Sen. Albritton /Rep. Clemons

**Summary:**

This legislation provides for a matching grant program to assist rural areas of opportunity as defined in statute. Regional economic development organizations representing rural counties and communities may apply annually for the grants that range from \$150,000 to \$250,000 depending on the regional impact of the organization. Under the Rural Infrastructure Fund, changes were made to allow the department to award grants of up to 50% of the total project costs to facilitate local government or private infrastructure efforts; expanding the list to include improving access and availability of broadband Internet services.

**Committee Assignments:**

SB 596: Appropriations

**ACTION RECOMMENDED: NEUTRAL**

### **Public Record Exemption: Utility Held Customer Information and Data**

(SB 600/HB 591)

**Sponsors:** Sen. Gibson /Rep. Yarborough

**Summary:**

Current law allows for public record requests to garner customer meter-derived data and billing information by a utility that is owned or operated by a unit of local government. With the installation of smart meter technology by many municipal electric utilities, the ability for more detailed information in increments less than one billing cycle is possible. This legislation would limit the level of the public records request to one billing cycle to protect and safeguard the customer's consumption data.

We believe electric cooperatives presently carry sufficient Director liability insurance to cover these additional requirements.
