

"So far, I know of six employees that have used it to purchase either a Ford or Chrysler vehicle for personal use and received substantial savings. Pioneer Electric Cooperative used the NRECA discount program when we purchased a skid steer loader. Because of the savings we were able to purchase additional attachments and still remain within our budget. Pioneer Electric employees have also used it for hotel stays and car rentals. The money saved is well worth the couple of minutes it takes to gather the information needed for all purchases."

- Mark Shogren, Manager of Purchasing, Materials & Facilities at Pioneer Electric Cooperative in Ulysses, Kansas

"I have purchased two vehicles using the program. I was happy with them, and I could tell from the salesman's reaction that it was a great discount".

-Tom Madsen, NRECA New Jersey Director from Sussex Rural Electric Cooperative on the Ford discount.
