## Don't let the EPA gamble with your money!

The EPA wants to impose new regulations on power plants. But the rules depend on technology that isn't ready yet – and won't be for a while. If the EPA's bet fails, many people will see higher power bills. And, it will be harder to create new jobs for hard-working Americans.

**Sign up today! Tell the EPA you disagree with its top-down rules. It takes less than 30 seconds to send a message directly to Washington, DC. And they need to hear from you!**

### TAKE ACTION

These rules will effectively ban new coal-based power plants, taking an abundant, affordable and domestic energy resource off the table. We need to use all of our American energy resources: natural gas, renewables, nuclear and coal.

EPA can balance energy needs and environmental concerns ... but they'll only do it if we speak up today!  
**Join the thousands of Americans** who want common-sense, affordable energy policies.

And don't forget we need everyone's help. Forward this to 5 friends or family members and ask them to sign up. At [Action.coop](#) they can learn more about these costly regulations and [tell the EPA](#) we can't afford higher electric bills.
