8-29-19

Due to the upcoming Storm Dorian moving closer to shore, we wanted to reach out to you regarding the services Lee Electrical Construction, Inc. provides. At this time, we have 80 5-8 men OH Distribution Crews available. A crew makeup entails: 5-8 men, 1 pickup, 1 digger derrick, 2 bucket trucks, 1 pole trailer and 1 material trailer. All of our equipment is excellent and modern and travels well during storm conditions. Our 80 available crews are stationed in Alabama, Georgia, South Carolina, North Carolina and Virginia and can move at a moment's notice if needed.

We invite you to visit our website www.lee-electrical.com as we also offer services on 8 different divisions from Transmission, OH & UG Distribution, Directional Drilling, Substation Installation and Maintenance, Fiber Installation, and Maintenance and of course Storm Response.

If you would like to discuss this further, you can reach me directly on my cell phone at 910-695-3278 or via email at jlee@lee-electrical.com.

Sincerely,

Jerry Lee
President
