

ADVANCEMENTS SINCE COVID-19

HOW WE HAVE ADVANCED SINCE THE PANDEMIC

AIR SCRUBBERS

DISINFECTANT

DISTANCE

Air Scrubber

Our sleep tent's HVAC system all contain Air Scrubbers by Aerus. These units attach directly to our HVAC units to remove air pollutants, VOS's, dust and are proven to kill over 90% of RNA viruses including coronavirus . Further, certified space technology continually protects and purifies the air.

Disinfectant

Monofoil antimicrobial spray is engineered to provide protection for 30 days or longer while also being non-toxic and non-leaching like most commercial cleaners. Monofoil is applied on all surfaces in the sleep tent as well as the return air filter.

Distance

Our double bed sleeping systems allow our beds to function as bunk beds and single beds in order to accommodate social distancing. Each mattress is five inches thick and encased in anti-bacterial vinyl.
