RE: Access to Restoration Areas During Emergency Recovery Operations

Electric Utilities must have access to their infrastructure for repair and maintenance purposes during emergency events.

If a natural disaster has occurred or if emergency conditions exist:

It is requested that Electric Utilities be granted access to the areas where restoration efforts are needed. Electric Utilities will be delivering materials necessary for the repair and restoration of the electric infrastructure. Included in this request is any truck or shipping company that an Electric Utility has contracted to deliver its products and services, please grant access to the areas where restoration efforts are in effect.

NOTE: The contract trucking or shipping companies will produce a document from an Electric Utility clearly identifying it as a sub supplier and authorizing them to deliver restoration supplies for Electric Utility services.

If any questions arise as to the validity of the companies requesting to enter the area during a declared emergency please contact the Emergency Coordinating Officer or Emergency Support Function 16 at the State Emergency Operations Center:
